

I support media diversity

Re: Docket No. 02-277, Biennial Review of FCC's broadcast media ownership rules-

Do NOT loosen the regulations to allow single-company ownership across media in a single market! If we can't promote, defend and preserve diversity in the print and electronic news media, we are doomed as a democracy. How can people decide what direction their country should take if they can only get their information from one source?

The current state of the majority of America's broadcast and cable outlets, controlled as they are by a mere handful of corporations, with their near-uniform editorial tone, is truly appalling if you compare it with the state of the same media even a decade ago, much less 15 or 20 years ago. For all of our sakes, don't let it get any MORE centrally controlled!!!

More and more people are worried about your impending actions, and are paying close attention. Remember that you are supposed to serve the public.
